

Method selectStudent :

```
@Override
public StudentModel selectStudent(String npm) {
    for(StudentModel student : studentList) {
        if(student.getNpm().equals(npm)) {
            return student;
        }
    }
    return null;
}
```

## Membuat Controller dan Fungsi Add

Pertanyaan 1 :

Tidak error

Pertanyaan 2 :

Error, karena parameter gpa merupakan required param namun tidak diberikan pada url tersebut.

## **Whitelabel Error Page**

This application has no explicit mapping for /error, so you are seeing this as a fallback.

Sat Mar 03 23:45:24 WIB 2018

There was an unexpected error (type=Bad Request, status=400).

Required double parameter 'gpa' is not present

## Method View by NPM

Pertanyaan 3 :

Ya, data muncul.

**NPM = 12345**

**Name = chanek**

**GPA = 3.43**

Pertanyaan 4 :

Tidak, data student tidak muncul. Karena data student pada list belum ada sehingga ketika dicari akan memberikan nilai null pada object student yang diberi ke view.

## Whitelabel Error Page

This application has no explicit mapping for /error, so you are seeing this as a fallback.

Sat Mar 03 23:59:39 WIB 2018

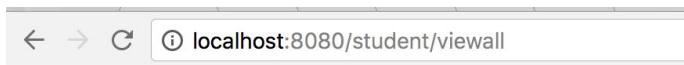

There was an unexpected error (type=Internal Server Error, status=500).

An error happened during template parsing (template: "class path resource [templates/view.html]")

## Method View All

Pertanyaan 5 :

Ya, muncul.

**No. 1**

**NPM = 12345**

**Name = chanek**

**GPA = 3.43**

---

Pertanyaan 6 :

Ya, muncul.

**No. 1**

**NPM = 12345**

**Name = chanek**

**GPA = 3.43**

---

**No. 2**

**NPM = 12346**

**Name = chanek**

**GPA = 3.43**

---

## Tahap-tapak menyelesaikan latihan

1. Membuat method `viewByPath()` di controller
2. Membuat view baru (`errorview.html`) di template resources untuk error view
3. Menambahkan method `deleteStudent` di interface `StudentService`
4. Meng-implement method tersebut di kelas `InMemoryStudentService`
5. Menambahkan view `delete.html` baru di template resource
